Princeton, NJ | srivatsaku@gmail.com | github.com/skuchi9 | linkedin.com/in/skuchib

EDUCATION

Purdue University

B.S. in Data Science, B.S. in Statistics: Mathematics Concentration

West Lafayette, IN

Aug. 2024 — Dec. 2027

- **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Linear Algebra, Probability, Discrete Mathematics, Real Analysis

EXPERIENCE

Research Scholar

July 2026 — Present

Purdue University, School of Information Studies

West Lafayette, IN

- Selected as an Office of Undergraduate Research (OUR) Scholar to study generative AI use in undergraduate research under Professor Jerilyn Pia Tinio
- Apply qualitative coding methods to analyze interview transcripts, producing insights to inform learning outcomes and structured research assignments for information studies courses
- Conduct think-aloud assessments with students to gather qualitative data on how they use AI tools

Machine Learning Intern

June 2026 — Aug. 2026

Cognivance Inc.

Skillman, NJ

- Built a document parsing pipeline using OCR, Docling, and vision-language models to extract text, tables, and diagrams from various document types, converting outputs into a standardized format
- Developed REST APIs with FastAPI and PostgreSQL to support backend services, and automated authentication workflows with Playwright to optimize testing and deployment
- Developed an AI enterprise chatbot for Johnson & Johnson, implementing retrieval-augmented generation (RAG) that reduced document retrieval latency by 30% during internal testing

Research Assistant

Jan. 2026 — May 2026

Purdue University, School of Sustainability and Environmental Engineering

West Lafayette, IN

- Conducted research under Professor Xinyu Zhang, collecting, cleaning, and analyzing data from 400+ participants
- Analyzed large datasets with Python (pandas, NumPy) and IBM SPSS to identify statistical trends supporting ongoing sustainability research
- Conducted comprehensive literature reviews in preparation for a first-author manuscript submission to a peer-reviewed journal

PROJECTS

Event Attendance Dashboard, Purdue Veteran & Military Success Center

Apr. 2025 — May 2025

- Analyzed participation, login, and company visit data using Python (pandas, NumPy), identifying engagement patterns that informed outreach strategies contributing to a 25% increase in event attendance
- Cleaned kiosk scan data by resolving timestamp inconsistencies, filling missing values, and removing duplicates, improving data reliability for analysis and reporting
- Built visualizations for an interactive dashboard using matplotlib and managed the project with Git, collaborating directly with clients to explain technical findings to non-technical audiences

EXTRACURRICULAR ACTIVITIES

Data Science Club

Apr. 2025 — Present

- Vice President of Purdue's largest data science club, increasing member engagement in projects and research through skill-building initiatives in data science and machine learning
- Design and deliver interactive workshops and mentor 30+ members in Python and machine learning, supporting the development of several student-led data science projects
- Build partnerships with student organizations across campus to organize a cross-club hackathon, resulting in a campus-wide hackathon attended by hundreds of students

SKILLS

- **Programming Languages:** Python, Java, SQL, R
- **Developer Tools:** Git, Excel, Tableau, Power BI, IBM SPSS, MySQL, PostgreSQL, MongoDB, Docker
- **Libraries:** pandas, NumPy, matplotlib, scikit-learn, PyTorch, FastAPI, Playwright, Docling
